

WHAT OUR PATIENTS ARE SAYING

"AZIV Infusion is the place to choose. They have a comfortable and supportive environment, with other patients that like me have an autoimmune disease. The nurses are compassionate and like family."

– Brenda B.

"AZIV Infusion makes it so easy – I just show up and relax."

– Dennis D.

We are committed to providing quality and safe care for those in need of biologic treatments.

Biologic Treatments For Autoimmune Diseases & Osteoporosis

AZIV Infusion delivers services for specialty infusion and injection therapies. These advanced therapies have radically changed the treatment of many immunologic based diseases, and have given new hope to many patients.

Our eight ambulatory infusion suites offer a reliable and convenient setting which you will find equipped with high-speed Wi-Fi, a flat screen TV and comfortable recliners. Our mission is to provide a site for patients to receive high-quality care from our skilled professional nurses and supervising physicians that is more cost-effective than hospital-based centers.

Infusions and other intravenous treatments can be lengthy—or even lifetime—commitments. It's essential to find an infusion therapy partner who cares about your wellness, your experience and your expense.

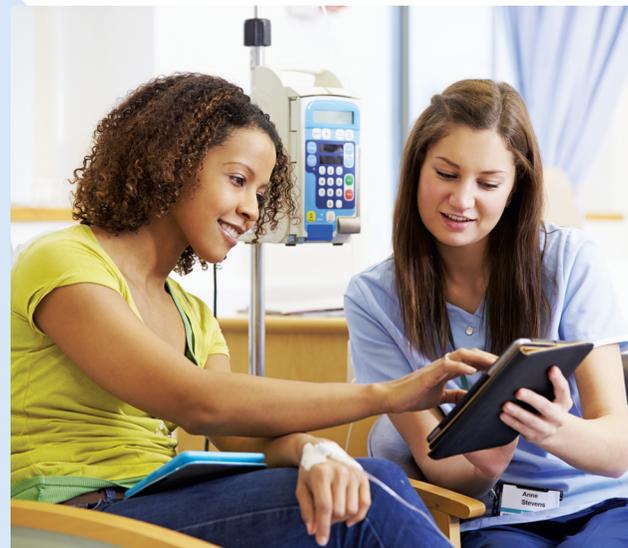

DEFINING YOUR EXPERIENCE

Time-saving Scheduling

Our intake specialists coordinate insurance pre-authorizations. We also seek any financial assistance that may be available to keep a patient's out of pocket expense as low as possible.

High Quality, Safe Care

Our expert registered nurses deliver compassionate care with a low patient to nurse ratio (3:1). We work with advanced and complex biologic therapies every day to ensure that our patients receive safe and consistent care.

Clinical Monitoring and Reporting

Our nurses closely monitor patients and keep referring healthcare providers informed with comprehensive reports.

Support and Education

We develop long-term relationships with our patients and ensure that each patient's care and educational needs are met.

COST EFFECTIVE

As compared to hospital-based centers our centers often have a shorter door-to-door time commitment. Our centers have a quick and easy check-in process and mixing of medications on-site instead of waiting for a pharmacy to deliver.

Many insurances have elected to utilize out patient centers vs hospital based, which may lower your out-of-pocket expense.

Each of our centers offer a multitude of biologic medications for a variety of autoimmune conditions to include:

- Rheumatological Conditions
- Osteoporosis
- Autoimmune Skin Diseases such as Psoriasis & Psoriatic Arthritis
- Inflammatory Bowel Diseases such as Ulcerative Colitis & Crohn's Disease
- Neurological Conditions such as Multiple Sclerosis
- Inflammatory Eye Disease
- Asthma
- Severe Hives

ABOUT BIOSIMILARS

AZIV Infusion may use biosimilars when approved by your physicians. These are molecules that have been approved by the FDA to be highly similar in structure and effectiveness to the more common originator biologic molecules like Remicade. These molecules have the advantage of usually being priced lower and can decrease costs to the patient and to the medical system.
